File: lcd_dual_mcu.kicad_sch

AT070TN92 7" 800x480 TTL panel driver: HDMI (LT8619C) + GT915 touch -> USB HID (STM32F072).

Power: USB-C 5 V (from Raspberry Pi USB port, ~0.7 A max with backlight at 100 %).

U10: STM32F072CBT6 or CH32X035C8T6 (same LQFP-48 footprint). SW2 = CH32 USB bootloader (D+ high at power-up).

Panel power-up order (MCU controlled): DVDD -> RESET -> VGL/AVDD -> VGH -> data -> backlight.

J3 pad numbers equal AT070TN92 FPC pin numbers; use a TOP-contact 0.5 mm 50-pin FPC connector.

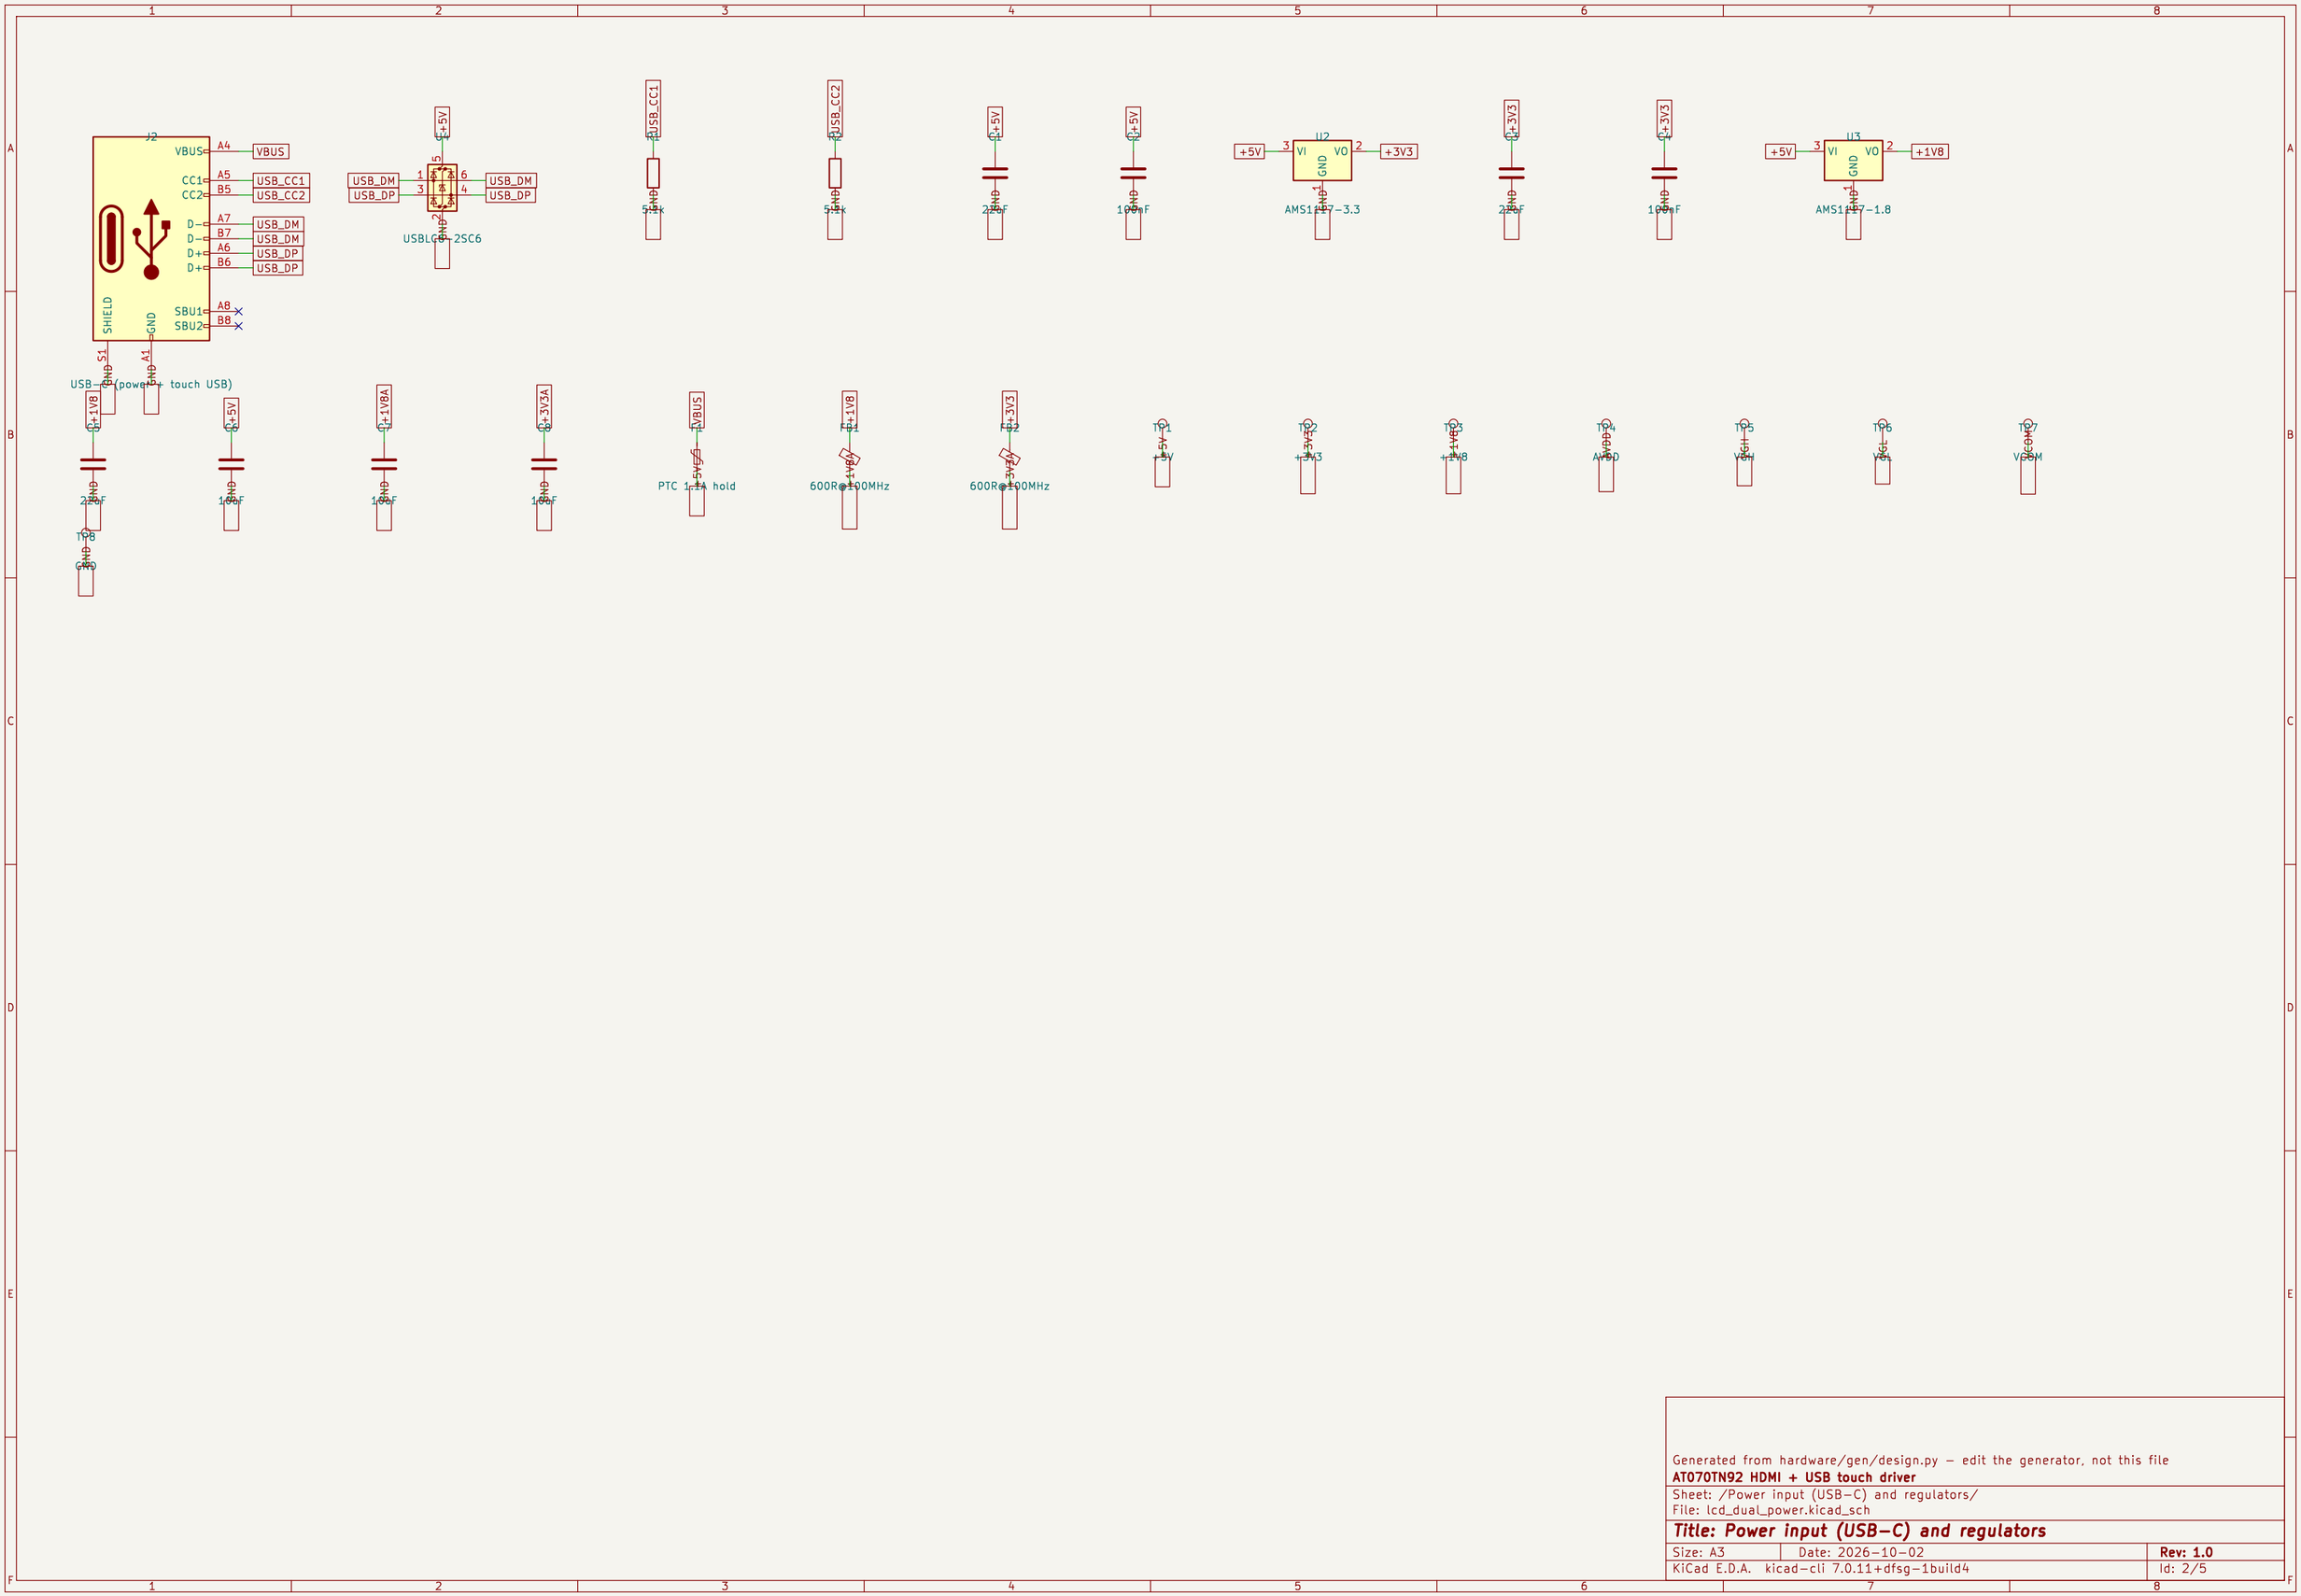

VCOM (pins 6/46) is adjustable with RV1 (2.55..4.5 V): trim for minimum flicker.

LT8619C HDMI->RGB888, TPS61040 bias, TPS61165 backlight, STM32F072 USB touch
